1. Overview

This document outlines the feature development roadmap for Jokes For, organized into three distinct phases. Each phase builds upon the previous, with clear success criteria that must be met before advancing.

1.1 Phase Summary

Phase	Focus	Timeline	Goal MAU
MVP	Core Discovery & Search	Months 1-6	10,000
Phase 2	Creator Economy & Social	Months 7-12	100,000
Phase 3	Brand Integration & Scale	Months 13-24	500,000+

2. MVP - Core Discovery Platform

Timeline: Months 1-6 | **Goal:** Prove people return for structured, personalized jokes

2.1 MVP Success Criteria (Gate to Phase 2)

- Weekly retention (D7) > 20%
- 10,000 Monthly Active Users
- Average user saves 5+ jokes
- Search queries per session > 2
- Viral coefficient > 0.3

2.2 MVP Feature List

2.2.1 1. Joke Search Engine (Core Feature)

Feature	Description	Priority
Full-text Search	Search jokes by keyword, topic, or phrase. Returns ranked results based on relevance.	P0
Context Filters	Filter by situation: wedding, work, school, presentation, so- cial media caption, icebreaker.	P0
Age Filters	Kid-safe (6-12), Teen (13-17), Adult (18+), Family-friendly (all ages).	P0
Humor Type Filters	Clean, dark, absurdist, dad jokes, puns, sarcasm, wordplay.	P0
Language Filter	Start with English + 2-3 key markets (e.g., Spanish, Arme- nian).	P0
Format Filter	One-liner, setup-punchline, short story, knock-knock.	P1

2.2.2 2. Daily Joke Panel

Feature	Description	Priority
Joke of the Day	Personalized daily joke based on user preferences. Updates at user's preferred time.	P0
Preference Onboarding	Quick 3-5 question flow to capture humor preferences on first launch.	P0
Push Notifications	Optional daily notification with joke preview. Configurable timing.	P1
Streak Tracking	Track consecutive days of app usage. Gamification for reten- tion.	P2

2.2.3 3. Joke Library & Collections

Feature	Description	Priority
Save Jokes	One-tap save to personal library. Persists across sessions.	P0
Create Collections	Organize saved jokes into custom folders (e.g., "Wedding Speech", "Work Jokes").	P0
Browse Library	View all saved jokes with search and filter within library.	P0
Share Collections	Generate shareable link to a collection. Public/private toggle.	P2

2.2.4 4. Sharing & Basic Social

Feature	Description	Priority
Copy to Clipboard	One-tap copy joke text for pasting anywhere.	P0
Share to Social	Native share sheet to WhatsApp, Instagram, Twitter, etc.	P0
Branded Share Card	Generate image card with joke + Jokes For branding for social sharing.	P1
Rate Jokes	Simple thumbs up/down or 1-5 laugh scale. Feeds recommendation algorithm.	P1

2.2.5 5. User Account & Settings

Feature	Description	Priority
User Registration	Email/password or social login (Google, Apple). Guest mode available.	P0
Preference Management	Edit humor preferences, age settings, language at any time.	P0
Notification Settings	Control push notification frequency and timing.	P1
Data Export	Download all saved jokes and collections.	P2

2.2.6 6. Content Infrastructure (Backend)

Feature	Description	Priority
Joke Database	5,000+ jokes with rich metadata (tags, age rating, language, culture, format).	P0
Search Index	PostgreSQL full-text search for fast, ranked search results.	P0
Recommendation Engine	Basic collaborative filtering based on saves, ratings, and preferences.	P1
AI Joke Generation	LLM integration to generate jokes on-demand (human-curated before display).	P2

3. Phase 2 - Creator Economy & Social

Timeline: Months 7-12 | **Goal:** Enable joke writers to publish and monetize

3.1 Phase 2 Success Criteria (Gate to Phase 3)

- 500+ active creators with content
- 50+ creators earning > \$100/month
- 100,000 Monthly Active Users
- Premium conversion rate > 5%

3.2 Phase 2 Feature List

3.2.1 1. Creator Profiles & Tools

Feature	Description	Priority
Creator Profile	Public profile with bio, avatar, humor style tags, social links.	P0
Joke Upload	Submit jokes with title, tags, category, age rating, language.	P0
Bulk Upload	CSV import for creators with existing joke libraries.	P1
Verification Badge	Verified status for established comedians and writers.	P2
AI Writing Assistant	Suggest improvements, tags, and language adaptations for jokes.	P2

3.2.2 2. Monetization Tools

Feature	Description	Priority
Creator Subscriptions	Fans subscribe to creators for \$1-\$10/month for exclusive content.	P0
Premium Joke Packs	Sell themed joke collections (\$2-\$20 one-time purchase).	P0
Tipping	One-time tips from fans (\$1-\$50).	P1
Custom Requests	Fans pay creators for personalized jokes (\$5-\$50).	P2
Payout System	Monthly payouts via Stripe. Creator gets 80-85%.	P0

3.2.3 3. Creator Analytics

Feature	Description	Priority
Performance Dashboard	Views, saves, shares per joke. Trend graphs.	P0
Revenue Tracking	Earnings breakdown by source (subs, packs, tips).	P0
Audience Insights	Demographics, top jokes, peak engagement times.	P1
Export Reports	Download analytics as CSV/PDF.	P2

3.2.4 4. Social Features

Feature	Description	Priority
Follow Creators	Follow favorite creators. See their new jokes in feed.	P0
Add Friends	Connect via username, contacts, or invite link.	P0
Joke Loops	Private groups for sharing jokes with friends (like group chats for humor).	P1
Comments	Comment on jokes. Creator can moderate.	P1
Activity Feed	See friends' saves, shares, and new follows.	P2

3.2.5 5. Premium Subscription (User-Facing)

Feature	Description	Priority
Premium Tier	\$2.99-\$5.99/month for enhanced features.	P0
Unlimited Access	No daily joke limit. Unlimited searches.	P0
Ad-Free Experience	Remove all advertisements.	P0
Advanced Filters	Access to premium filter options and exclusive collections.	P1
AI Joke Generator	Generate custom jokes on demand.	P1

4. Phase 3 - Brand Integration & Scale

Timeline: Months 13-24 | **Goal:** Monetize through B2B and expand globally

4.1 Phase 3 Success Criteria

- 10+ brand partnerships generating revenue
- 500,000+ Monthly Active Users
- Path to profitability visible
- Expansion to 20+ languages

4.2 Phase 3 Feature List

4.2.1 1. Brand Accounts & Campaigns

Feature	Description	Priority
Brand Profiles	Verified brand accounts with logo, bio, and campaign history.	P0
Campaign Manager	Create, schedule, and manage branded joke campaigns.	P0
Branded Jokes	Native humor ads that feel like content, not ads.	P0
Geo-Targeting	Show branded jokes to users in specific cities, regions, or countries.	P0
"Closest Location"	Link jokes to nearest store/lounge location.	P1

4.2.2 2. Brand Analytics & Reporting

Feature	Description	Priority
Campaign Dashboard	Real-time views, engagement, shares, clicks.	P0
Audience Breakdown	Demographics, location, humor preferences of reached users.	P1
Conversion Tracking	Track clicks to "Closest Location" and external links.	P1
ROI Reports	Compare performance vs. traditional digital ads.	P2

4.2.3 3. Self-Serve Ad Platform

Feature	Description	Priority
Campaign Builder	DIY tool for small businesses to create campaigns.	P1
Budget Controls	Set daily/total budget. CPM-based pricing.	P1
Targeting Options	Select audience by age, location, humor type.	P1
A/B Testing	Test multiple joke variants to find best performer.	P2

4.2.4 4. API & Enterprise

Feature	Description	Priority
Public API	RESTful API for third-party integrations (\$99-\$999/month).	P1
Chatbot Integration	Embed jokes in customer service bots, Slack, Discord.	P1
Enterprise Packages	Custom solutions for corporate events, team-building.	P2
Humor Intelligence	Data reports on humor trends by region/demographic.	P2

4.2.5 5. Global Expansion

Feature	Description	Priority
20+ Languages	Expand from initial 3 languages to 20+.	P0
Cultural Adaptation	Hire local comedy writers for culturally native content.	P0
Regional Dialects	Support for regional variations (e.g., Latin American vs. European Spanish).	P1
Local Trending	Country/city-specific trending jokes.	P1

5. Priority Legend & Development Notes

5.1 Priority Definitions

P0	Must Have - Core to the phase. Do not launch phase without these.
P1	Should Have - Important for full experience. Build within the phase timeline.
P2	Nice to Have - Build if time permits. Can be deferred to next phase.

5.2 Critical Development Principles

1. **Build P0 features first, always.** Do not start P1 until all P0 are complete and tested.
2. **Validate before building.** If a Phase 1 feature shows no usage, do not build its Phase 2 extension.
3. **Retention over features.** If weekly retention is below 15%, stop all feature work and fix the core experience.
4. **Content quality > feature quantity.** 1,000 perfectly-tagged funny jokes beats 10,000 mediocre ones.
5. **Kill features that don't work.** If daily notifications don't drive retention, remove them. Don't fall in love with features.

5.3 Technical Stack Recommendations

- **Backend:** Django 5.x with Django REST Framework
- **Database:** PostgreSQL with full-text search
- **Frontend (Web):** Next.js or React
- **Mobile:** React Native or Flutter for cross-platform
- **AI:** Ollama (local) → OpenAI/Anthropic (production)
- **Payments:** Stripe for subscriptions and creator payouts
- **Analytics:** Mixpanel or Amplitude for user behavior tracking
- **Push:** Firebase Cloud Messaging or OneSignal

5.4 MVP Timeline Estimate

Milestone	Timeline
Content curation (5,000 jokes)	Weeks 1-4 (parallel with dev)
Backend + Database + Search	Weeks 1-6
Mobile App (P0 features)	Weeks 4-12
Internal testing + bug fixes	Weeks 12-14
Beta launch (100-500 users)	Weeks 14-16
Iterate based on feedback	Weeks 16-20
Public launch	Weeks 20-24 (Month 5-6)
